(Chapter II of the Patent Cooperation Treaty)

(PCT Rule 71.1)

To: Alban Tay Mahtani & De Silva 39 Robinson Road #07-01 Robinson Point Singapore 068911		Date of mailing <i>(day/month/year)</i> 22 FEB 2006	
Applicant's or agent's file reference 2050030KC <i>7085302</i>		IMPORTANT NOTIFICATION	
International application No. PCT/SG2005/000061	International filing date <i>(day/month/year)</i> 1 March 2005	Priority date <i>(day/month/year)</i> 15 March 2004	
Applicant TINGGI TECHNOLOGIES PRIVATE LIMITED et al			

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translations to those Offices.
4. **REMINDER**

 The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

 Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

 For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the *PCT Applicant's Guide*.

 The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed invention is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

The above art describe the removal of the substrate but it is always replaced by another layer. They disclose a reflecting layer but it is disposed on the textured surface of the substrate which is contained in the middle of the device, not on the bottom or it is without the substrate. Therefore the removal of the substrate and the patterning of the epitaxial layers thus revealed, with a reflecting ohmic layer on the top surface of the epitaxial layers can be said to novel and to have an inventive step.

50. A semiconductor device as claimed in any one of claims 43 to 49, wherein the thermally conductive metal is copper and the epitaxial layers comprise multiple GaN-related epitaxial layers.
- 5 51. A semiconductor device as claimed in any one of claims 43 to 50, wherein the semiconductor device is selected from the group consisting of: a light emitting device, and a transistor device.
- 10 52. A semiconductor device as claimed in any one of claims 43 to 50, wherein the second ohmic contact layer is selected from the group consisting of: blank, and patterned.
- 15 53. A semiconductor device fabricated by the method of any one of claims 1 to 42.
